

Anti-Rpn12(*S. cerevisiae*) antibody, rabbit polyclonal

Product code	62-209
Size	50 µl
Storage	-20°C
Concentration	N/A
Buffer	1 mg/ml BSA, 0.09 % sodium azide and 50% glycerol in PBS-
Purity	IgG fraction purified with affinity chromatography from rabbit antiserum
Immunogen	Recombinant yeast Rpn12 expressed in <i>E. coli</i> (Ref. 2)
Isotype	Rabbit IgG
Reactivity	<i>S. cerevisiae</i> Rpn12 protein Not tested with other species.
Special notes	N/A
Application	1. Western blotting (1/5000-1/10000) 2. Immunoprecipitation Not tested for other applications
Background	The 26 S proteasome is a protein complex with a molecular mass of ~2,000 kDa. It is essential not only for eliminating damaged or misfolded proteins but also for degrading short lived regulatory proteins involved in cell cycle regulation, DNA repair, signal transduction, apoptosis, and metabolic regulation (ref.1). The 26S proteasome is composed of the 20S core particle (CP) and the 19S regulatory particle (RP). The RP is further subdivided into lid and base sub-complexes. Rpn12 is one of the non-ATPase subunits of the lid. Rpn12 interacts with an ATPase subunit, Rpt1, of the base. Rpn12 , Rpt1 double mutant becomes lethal, suggesting a strong interaction between Rpn12 and Rpt1. In the double mutant cells, the function of the 26S proteasome is completely eliminated.
