

Anti-Sld5 (*S. pombe*) antibody, rabbit polyclonal

63-035 100 µl

Shipping and Storage: Ship at 4°C and store at -20°C.

Immunogen: Recombinant His6 *S. pombe* Sld5 protein (full size).

Reactivity: Reacts with *S. pombe* Sld5 protein (MW: 25k).

Application:

Western blot (1/1000-1/2000)

Form: Anti-Sld5 serum added with sodium azide, 0.09 %.

Background: Sld5 is a component of GINS complex which plays an essential role in the initiation of DNA replication. Has a role in chromosome segregation and is required for bir1 localization.

Subcellular location: Nucleus

Data Link: UniProtKB [Q9P7C8](#) (*S. pombe*)

Fig.1 Western Blot of Sld3 protein

Anti-Sld5 antibody was used at 1/500 dilution. Second antibody (goat anti-rabbit IgG antibody HRP-conjugated, ab97051) was used at 1/10,000 dilution. *S. pombe* extract, 8 µg. Signal enhancer, Can Get Signal (TOYOBO, Osaka), was used in primary and secondary antibody reactions.

The antibody detects a 27 kDa band, slightly larger than the one predicted from the protein sequence, 25 kDa.
